

Thesis UIBE 2019/2020

Balogh Ladislav	Air quality assessment in the selected region in terms of selected indicators
Kohúčík Ľuboš	Air quality assessment in the selected region in terms of selected indicators
Kosár László	Usage of carbonaceous materials as sorbents for the removal of contaminants from waste water
Markovičová Alexandra	Optimisation of manual handling of loads during pulling and pushing in the course of the work process using methods of physical workload assessment in the selected company
Matušov Dominik	Study of selected fire characteristics of combustible industrial dusts
Otajovičová Mária	The applications of Raman spectroscopy in the identification of hazardous chemicals for Fire and Rescue Corps units
Mihelová Martina	The use of oxidation processes for paracetamol degradation from water solution
Nevolný Radoslav	Transport of hazardous substances in specific conditions
Petrášová Zuzana	Monitoring of municipal solid waste landfill
Rodinová Simona	Monitoring of municipal solid waste landfill
Mištinová Kristína	Radiation protection in Jaslovské Bohunice nuclear power plant
Šebová Andrea	Analyzes of safety transportation models of radioactive waste in European Union
Škutová Radoslava	Evaluation of air quality in the surroundings of selected company
Oravcová Andrea	Effect of environmental contaminants on selected microbial communities
Bukovič Martin	Safety requirements for modernizing lifts
Janušková Petra	First aid in chemical laboratory
Duchoň Dalibor	Study of explosion characteristics of selected macromolecular dust
Božík Matej	Evaluation of surface water status in selected locality
Balková Lívia	The use of AOP for degradation of phenols

Anina Tomáš

Risk analysis of selected technical devices in Center of Excellence of 5-axis machining

**Bednáriková Mária
Zuzana**

Different methods of lignin removal from wood

Gereková Dominika

Optically transparent wood-resin biocomposite

Hruška Tomáš

Safety in the field of robotics in a selected company
