

Please, tell us something about you.

Name and surname: Daynier Rolando Delgado
Sobrino

Where are you from? : Cuba

Name of your University: MTF STU

Year of attendance: 2nd year

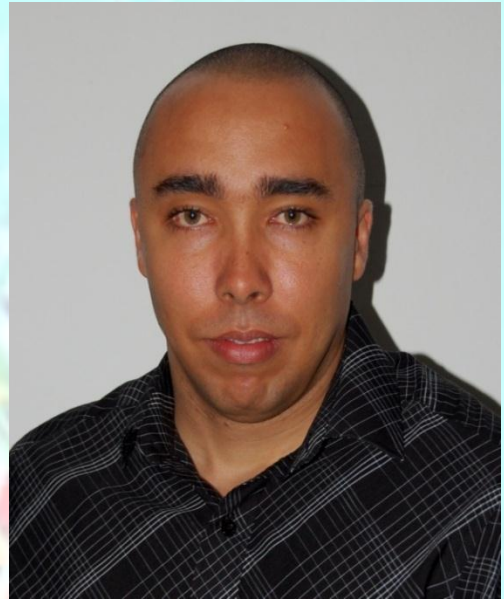

What major are you in? : Production devices and systems

What is your hobby? :

Sports, funny TV shows, learning languages, travelling, etc.

What do you like about Slovak people? 😊:

In Slovakia there are good people like in any other part of the world. I've met some already. However, despite this is a very general statement and may sound weird, I've lived enough time here so as to say I do not like many things about the Slovak people, hopefully time will prove me wrong and I would be happier then. One of the things I like is that Slovaks, peacefully and in civilized way, (also generally speaking) still enjoy taking part in some of the historical and traditional activities. Slovaks are proud nation.

Do you like Slovakia and what do you like the most about Slovakia? :

It has its charms, nice culture, nature and traditions. I also like the food and the architecture.

Tell us something more about you (whatever you want) ☺:

I am turning 30 years old. I studied Industrial Engineering in Cuba in a 5 years full-time period. Right after this I studied a 2 years master program which I finished in 2009. I wish I could finish my PhD. since this is a goal of many years. I also wish I could find more GOOD friends in Slovakia where GOOD stands for honest, helpful, with a better understanding of manhood and womanhood and specially stands for not talking so much about the others behind their backs, but instead being eager to face them and help them make the things right.
