- To manage the input and output **resources** and **time schedules**
- To **finalize** and **hand over** the project

NMH SRO
ENGINEERING & PRODUCTION
SUSTAINABLE SOLUTIONS

NMH was founded in 2010 in Sered', Slovakia, mainly as a production facility. NMH is a member of the Heilig Group, founded in 1978. Today it consists of eight associated companies in four countries, the Netherlands, Germany, Poland and Slovakia, and employs more than 300 people.

We have a shop floor size of almost 5,000 m2. At NMH we concentrate on manufacturing for all of the subsidiaries of the Heilig Group, mainly B+B Anlagenbau, Bezner and Bezner-Oswald. Although NMH is a young subdivision, the Heilig Group has decades of experience in waste management, recycling, bulk handling and wood processing.

Our professional team consists of 80 employees: 10 design engineers, with full 3D & 2D design application software, 50 technical assemblers, welders and other technicians and 8 project managers who keep our projects organised. Quality assurance and inspection is adhered to through the complete lifecycle of the manufacturing process.

Our technical know-how in combination with years of practical experience guarantees high quality products. Many of our installations are supplied as turnkey solutions.

Make yourself an opinion on how it looks behind the corporate walls. Watch our company [VIDEO](#).
