Job description, responsibilities and duties

Job description, responsibilities and duties:

We are looking for a candidate who will fit into the current production engineering team. This job will require the successful candidate to work within the production area and involves re-organizing the production flow and implementing process improvements to improve efficiency and reduce cycle times.

- Completing assigned projects related to production layout and process improvements
- Identifying new production methods to improve efficiency
- Coordinating the continuous improvement team meetings where necessary
- Coaching and training the people in new work methods
- Follow through the implementation of improvements to completion
- Follow up on the analysis of the benefits
- Work as required on new product introductions.

Employee benefits

- Employer's contribution to DDS up to 3% of the gross salary
- Training plan within the company
- Contributions from the Social Fund for the Birth of a Child, at a Wedding, Life Jubilee and Retirement
- 'Family day' for employees and their family members
- Christmas party
- Supported Hot Drinks with the Social Fund
- Parking in front of the building of the company in a guarded parking lot
- One shift model
