

Theses UMAT – 2019

[Imrišková, Michaela](#) Analysis of the influence of gas flow in the continuous furnace on the magnetic properties of Vitroperm cores

[Kyjak, Dominik](#) The study of microstructure changes of dualphase stainless steel during welding process

[Joščák, Jakub](#) Study of polymer-matrix composites reinforced with glass fibers

[Gubrický, Miloš](#) The properties of rubber blends with addition of zeolites

[Garai, Viktor](#) Influence of fillers on mechanical properties of polymer composites

[Gavenda, Adam](#) The influence of deposition parameters on selected properties of high hard coatings

[Paulovič, Filip](#) Analysis of hot-dip coatings on steel substrate after cold deformation

[Tomšová, Romana](#) Microstructure, phase constitution and corrosion resistance of binary Al-Co alloys in alkaline solution

[Velický, Dominik](#) Quenching of membrane springs with pressing machine - influence of quenching parameters on hardened part

[Vyskočová, Petra](#) Analysis of soldered joints of superconducting tapes

[Pavůček, Imrich](#) The analysis of the damaged ball pin during riveting

[Stanovičová, Silvia](#) Thermal stabilization of superconducting tapes for fault current limiters

[Suchánek, Henrich](#) Influence of Fe-Zn alloy layer on drawing ability of high carbon steel wire

[Špaček, Lukáš](#) Influence of hot-dip galvanising defects on surface quality of drawn wire

[Šulhánek, Patrik](#) High temperature oxidation of aluminium based alloys
